

Non-Food Crops for a European BioEconomy

PANACEA in a nutshell

PANACEA Network aims at the dissemination of near-to-practice applicable cases of Non-Food Crops and at the cooperation between research, industry and farming community, in order to increase the contribution of Non-Food Crops to the European Bio-economy Strategy.

Non-food crops (NFC) are those that do not enter the food chains and are used to produce a wide range of bio-based products including polymers, lubricants, construction materials, pharmaceuticals, as well as bioenergy and fuels. But NFC are not widespread in European agriculture, mainly due to challenges in supply chains and policy gaps.

3 years
starting November 2017

€ 1.999.500
budget funded by Horizon 2020

16 Partners
Coming from 10 countries

+200 Non Food Crops
Near-to-practice crops assessed

+250 farmers & +100 industries consulted
About Non-Food Crops challenges and opportunities

+850 stakeholders
Engaged in events for new Value Chain creation

PANACEA
is a Thematic
Network
funded by
Horizon 2020
and backed
up by
EIP-AGRI.

PANACEA offers,

Knowledge

You will get to know success cases of Non-Food Crops with useful information about their cultivation and potential economic impact.

Training

Farmers, advisors and agricultural students will be trained on near-to-practice Non-Food Crops.

Business opportunities

Get involved on new Value Chains between farmer and bio-based industries, demanders of such crops, allowing diversifying farmers' crop production.
